The Upright Hierophant is an interpreter of mysteries and esoteric principals. The Hierophant is concerned with the application of spiritual knowledge to the physical world. It is often a sign that it is time to think about giving up your routines, your old way of doing things, and to move into the unknown. Perhaps consider what life would be like if we truly lived by what we believe. It may also represent somebody who can be stubborn and exasperating. This person is constantly searching for truth without realizing that the truth they are seeking is inside of themselves. They are just too stubborn to realize and accept this fact. This person is totally against any changes in their life. In addition to this, the card represents somebody who is very concerned with outward appearances and likes to impress others. This person often belongs just for the sake of belonging.

The reversed Hierophant card represents somebody who is original and not afraid to take chances. This person is a real adventurer and has a totally open mind. This card can also represent somebody who will be willing to listen to new ideas that the subject might have. This card can indicate that the subject should speak his mind and have the courage of his convictions. In extreme readings, this card can signify that something new and refreshing is going to come into the person's life.
