THE HIGH PRIESTESS

Thoughts are Things!
Choose the good ones!

THE UPRIGHT HIGH PRIESTESS: represents intuition, secret knowledge ,the super natural and psychic realms. It can also indicate hidden information that has yet to be revealed. Drawing this card may refer to changes taking place within you; the gather of energy before the physical action is taken. There could be a surprise in your immediate future .It is the card of knowledge, instinctual, supernatural, secret knowledge .The moon crown on her head as well as the crescent by her foot indicates her willingness to illuminate what you otherwise might not see, reveal the secrets you need to know in order to make a decision about a problem , job, an investment, love career, family, ect.

THE REVERSED HIGH PRIESTESS: The reverse key of this card signifies a superficial situation; one with no real secrets. If this card comes up in the reverse position, you need to examine everything. Don't blindly give away your trust until you know the situation and understand it. This position can refer to a person who is weak or lacking energy. This could greatly affect a relationship or support that you may need from another person.
 In the extreme cases, this reversed position suggests that a complete review of the entire situation is in order. In most cases , strength is lacking and a deeper commitment is needed in order to make the situation work.

Full moon comes to us on November 13th at 1:17am. This moon is known as the morning moon. The moon of decent. It is a time to look inward at the truth and falsehoods within ourselves.
