## Messages From Water How water structure reflects our consciousness

by [WellnessGoods.com](http://WellnessGoods.com)

Water is telling us to take a much deeper look at our selves. When we do look at our selves through the mirror of water, the message becomes amazingly, crystal, clear. We know that human life is directly connected to the quality of our water, both within and all around us. The photographs and information in this article reflect the work of Masaru Emoto, a creative and visionary Japanese researcher. Mr. Emoto has published an important book, "The Message from Water" from the findings of his worldwide research. If you have any doubt that your thoughts affect everything in, and around you, the information and photographs that are presented here, taken from the book of his published results, will change your mind and alter your beliefs, profoundly.

How the molecular structure of water is affected...

From Mr. Emoto's work we are provided with factual evidence, that human vibrational energy, thoughts, words, ideas and music, affect the molecular structure of water, the very same water that comprises over seventy percent of a mature human body and covers the same amount of our planet. Water is the very source of all life on this planet, the quality and integrity are vitally important to all forms of life. The body is very much like a sponge and is composed of trillions of chambers called cells that hold liquid. The quality of our life is directly connected to the quality of our water. Water is a very malleable substance. Its physical shape easily adapts to whatever environment is present. But its physical appearance is not the only thing that changes, the molecular shape also changes. The energy or vibrations of the environment will change the molecular shape of water. In this sense water not only has the ability to visually reflect the environment but it also molecularly reflects the environment. Mr. Emoto has been visually documenting these molecular changes in water by means of his photographic techniques. He freezes droplets of water and then examines them under a dark field microscope that has photographic capabilities. His work clearly demonstrates the diversity of the molecular structure of water and the effect of the environment upon the structure of the water. Discover how each source has an effect on the visual photographed structure...

Snow has been falling on the earth for more than a few million years. Each snowflake, as we have been told, has a very unique shape and structure. By freezing water and taking a photograph of the structure, as Mr. Emoto has done, you get incredible information about the water. Mr. Emoto has discovered many fascinating differences in the crystalline structures of water from many different sources and different conditions around the planet. Water from pristine mountain streams and springs show the beautifully formed geometric designs in their crystalline patterns. Polluted and toxic water from industrial and populated areas and stagnated water from water pipes and storage dams show definitively distorted and randomly formed crystalline structures. After seeing water react to different environmental conditions, pollution and music, Mr. Emoto and colleagues decided to see how thoughts and words affected the formation of untreated, distilled, water crystals, using words typed onto paper by a word processor and taped on glass bottles overnight. The same procedure was performed using the names of deceased persons. The waters were then frozen and photographed. **Energized water has had its molecules returned to their original life-giving, super moisturizing state.** This allows maximum moisture absorption into the cells of your body, pets and plants; a major key to healing, and the maintenance of health and vitality. Dr. Emoto has revealed to the world the power of water's vibration. **Take the next step** and bring this transformation into your life and into your part of the world by naturally structuring your water.

These photographs show the incredible reflections of water, as alive and highly responsive to every one of our emotions and thoughts. **It is quite clear that water easily takes on the vibrations and energy of it's environment, whether toxic and polluted or naturally pristine.**

Masaru Emoto's extraordinary work is an awesome display, and powerful tool, that can change our perceptions of ourselves and the world we live in, forever. We now have profound evidence that we can positively heal and transform ourselves and our planet by the thoughts we choose to think and the ways in which we put those thoughts into.
