MOON PHASES

Full Moon comes to us on September 15th at 5:13 am in Pisces. It goes Void of course at 3:03pm Then enters Aries at 5:39pm

The **Upright Fool** card represents a new beginning, a fresh start in any aspect of our life. When this card is drawn, we are faced with important choices and decisions which need to be made as we begin this new life-cycle and to deal with any difficult challenges along the way. The Fool tells us to face these challenges with energy, optimism and faith, which will ensure a positive outcome. It also points out that we must develop faith in our abilities to make the right choices, to keep the faith, and to walk our own unique path with optimism and hope.

The **Reversed Fool** card gives us a clear warning that we must resist the temptation to act recklessly or immaturely in any new situation. We must accept our responsibilities and commitments and honor them wholly. Due consideration is required - problems and indiscretions resulting from impatience or impulsiveness are indicated. It also shows inhibitions that are caused by mental, emotional and physical restraints and tensions. We are burdened with a sense of obligation towards society and our daily duties.
